PATTERN CLASSIFICATION

Second Edition

Richard O. Duda

Peter E. Hart

David G. Stork

CONTENTS

	PREFACE	xvii
1	INTRODUCTION	1
	 1.1 Machine Perception, 1 1.2 An Example, 1 1.2.1 Related Fields, 8 1.3 Pattern Recognition Systems, 9 1.3.1 Sensing, 9 1.3.2 Segmentation and Grouping, 9 1.3.3 Feature Extraction, 11 1.3.4 Classification, 12 1.3.5 Post Processing, 13 	
	1.4 The Design Cycle, 14 1.4.1 Data Collection, 14 1.4.2 Feature Choice, 14 1.4.3 Model Choice, 15 1.4.4 Training, 15 1.4.5 Evaluation, 15 1.4.6 Computational Complexity, 16 1.5 Learning and Adaptation, 16	
	1.5.1 Supervised Learning, 16 1.5.2 Unsupervised Learning, 17 1.5.3 Reinforcement Learning, 17 1.6 Conclusion, 17 Summary by Chapters, 17 Bibliographical and Historical Remarks, 18 Bibliography, 19	
2	BAYESIAN DECISION THEORY	20
	 2.1 Introduction, 20 2.2 Bayesian Decision Theory—Continuous Features, 24 2.2.1 Two-Category Classification, 25 2.3 Minimum-Error-Rate Classification, 26 *2.3.1 Minimax Criterion, 27 	

	#0.00 NT D 0'4 '- 00
	*2.3.2 Neyman-Pearson Criterion, 28
2.4	Classifiers, Discriminant Functions, and Decision Surfaces, 29
	2.4.1 The Multicategory Case, 29
	2.4.2 The Two-Category Case, 30
2.5	The Normal Density, 31
	2.5.1 Univariate Density, 32
	2.5.2 Multivariate Density, 33
2.6	Discriminant Functions for the Normal Density, 36
	2.6.1 Case 1: $\Sigma_i = \sigma^2 \mathbf{I}$, 36
	2.6.2 Case 2: $\Sigma_i = \Sigma$, 39
	2.6.3 Case 3: Σ_i = arbitrary, 41
	Example Decision Regions for Two-Dimensional
	Gaussian Data, 41
*2.7	Error Probabilities and Integrals, 45
	Error Bounds for Normal Densities, 46
	2.8.1 Chernoff Bound, 46
	2.8.2 Bhattacharyya Bound, 47
	Shample 2 Error Bounds for Gaussian Distributions, 48
	2.8.3 Signal Detection Theory and Operating Characteristics, 48
2.9	Bayes Decision Theory—Discrete Features, 51
,	2.9.1 Independent Binary Features, 52
	Example 3 Bayesian Decisions for Three-Dimensional
	Binary Data, 53
*2 10	Missing and Noisy Features, 54
2.10	2.10.1 Missing Features, 54
	2.10.1 Wilsing Features, 54 2.10.2 Noisy Features, 55
*2 11	Bayesian Belief Networks, 56
2.11	Example 4 Belief Network for Fish, 59
*2 12	Compound Bayesian Decision Theory and Context, 62
	mary, 63
	lographical and Historical Remarks, 64
	lems, 65
	·
	puter exercises, 80
DIUL	ography, 82
	VIALUA LIVELUACOD AND DAVEGIAN
	XIMUM-LIKELIHOOD AND BAYESIAN
PAR	RAMETER ESTIMATION
3 1	Introduction, 84
	Maximum-Likelihood Estimation, 85
5.2	3.2.1 The General Principle, 85

- 3.2.2 The Gaussian Case: Unknown μ , 88
- 3.2.3 The Gaussian Case: Unknown μ and Σ , 88
- 3.2.4 Bias, 89
- 3.3 Bayesian Estimation, 90
 - 3.3.1 The Class-Conditional Densities, 91
 - 3.3.2 The Parameter Distribution, 91
- 3.4 Bayesian Parameter Estimation: Gaussian Case, 92
 - 3.4.1 The Univariate Case: $p(\mu|\mathcal{D})$, 92
 - 3.4.2 The Univariate Case: $p(x|\mathcal{D})$, 95
 - 3.4.3 The Multivariate Case, 95

3.5 Bayesian Parameter Estimation: General Theory, 97
Example 1 Recursive Bayes Learning, 98
3.5.1 When Do Maximum-Likelihood and Bayes Methods Differ?, 100
3.5.2 Noninformative Priors and Invariance, 101
3.5.3 Gibbs Algorithm, 102
*3.6 Sufficient Statistics, 102
3.6.1 Sufficient Statistics and the Exponential Family, 106
3.7 Problems of Dimensionality, 107
3.7.1 Accuracy, Dimension, and Training Sample Size, 107
3.7.2 Computational Complexity, 111
3.7.3 Overfitting, 113
*3.8 Component Analysis and Discriminants, 114
3.8.1 Principal Component Analysis (PCA), 115
3.8.2 Fisher Linear Discriminant, 117
3.8.3 Multiple Discriminant Analysis, 121
*3.9 Expectation-Maximization (EM), 124
Example 2 Expectation-Maximization for a 2D Normal Model, 126
3.10 Hidden Markov Models, 128
3.10.1 First-Order Markov Models, 128
3.10.2 First-Order Hidden Markov Models, 129
3.10.3 Hidden Markov Model Computation, 129
3.10.4 Evaluation, 131
Example 3 Hidden Markov Model, 133
3.10.5 Decoding, 135
Example 4 HMM Decoding, 136
3.10.6 Learning, 137
Summary, 139
Bibliographical and Historical Remarks, 139
Problems, 140
Computer exercises, 155
Bibliography, 159
NONPARAMETRIC TECHNIQUES 16
11 T . 1 . 1 1 1 1 1
4.1 Introduction, 161
4.2 Density Estimation, 161
4.3 Parzen Windows, 164
4.3.1 Convergence of the Mean, 167
4.3.2 Convergence of the Variance, 167
4.3.3 Illustrations, 168
4.3.4 Classification Example, 168
4.3.5 Probabilistic Neural Networks (PNNs), 172
4.3.6 Choosing the Window Function, 174
4.4 k_n -Nearest-Neighbor Estimation, 174
4.4.1 k_n -Nearest-Neighbor and Parzen-Window Estimation, 176
4.4.2 Estimation of <i>A Posteriori</i> Probabilities, 177
4.5 The Nearest-Neighbor Rule, 177
4.5.1 Convergence of the Nearest Neighbor, 179
4.5.2 Error Rate for the Nearest-Neighbor Rule, 180
4.5.3 Error Bounds, 180
4.5.4 The k-Nearest-Neighbor Rule, 182

 4.5.5 Computational Complexity of the k-Nearest-Neighbor Rul 4.6 Metrics and Nearest-Neighbor Classification, 187 4.6.1 Properties of Metrics, 187 4.6.2 Tangent Distance, 188 *4.7 Fuzzy Classification, 192 *4.8 Reduced Coulomb Energy Networks, 195 4.9 Approximations by Series Expansions, 197 Summary, 199 Bibliographical and Historical Remarks, 200 Problems, 201 Computer exercises, 209 Bibliography, 213 	e, 184
LINEAR DISCRIMINANT FUNCTIONS	
5.1 Introduction, 215	
5.2 Linear Discriminant Functions and Decision Surfaces, 216	
5.2.1 The Two-Category Case, 216	
5.2.2 The Multicategory Case, 218	
5.3 Generalized Linear Discriminant Functions, 219	
5.4 The Two-Category Linearly Separable Case, 223	
5.4.1 Geometry and Terminology, 224	
5.4.2 Gradient Descent Procedures, 224	
5.5 Minimizing the Perceptron Criterion Function, 227	
5.5.1 The Perceptron Criterion Function, 227	
5.5.2 Convergence Proof for Single-Sample Correction, 229	
5.5.3 Some Direct Generalizations, 232	
5.6 Relaxation Procedures, 235	
5.6.1 The Descent Algorithm, 235	
5.6.2 Convergence Proof, 237	
5.7 Nonseparable Behavior, 238	
5.8 Minimum Squared-Error Procedures, 239	
5.8.1 Minimum Squared-Error and the Pseudoinverse, 240	
Example Constructing a Linear Classifier by Matrix	
Pseudoinverse, 241	
5.8.2 Relation to Fisher's Linear Discriminant, 242	
5.8.3 Asymptotic Approximation to an Optimal Discriminant, 2	243
5.8.4 The Widrow-Hoff or LMS Procedure, 245	
5.8.5 Stochastic Approximation Methods, 246	
5.9 The Ho-Kashyap Procedures, 249	
5.9.1 The Descent Procedure, 250	
5.9.2 Convergence Proof, 251	
5.9.3 Nonseparable Behavior, 253	
5.9.4 Some Related Procedures, 253	
*5.10 Linear Programming Algorithms, 256	
5.10.1 Linear Programming, 256	
5.10.2 The Linearly Separable Case, 257	
5.10.3 Minimizing the Perceptron Criterion Function, 258	
*5.11 Support Vector Machines, 259	
5.11.1 SVM Training, 263	
Example 2 SVM for the XOR Problem, 264	

	5.12 Multicategory Generalizations, 265
	5.12.1 Kesler's Construction, 266
	5.12.2 Convergence of the Fixed-Increment Rule, 266
	5.12.3 Generalizations for MSE Procedures, 268
	Summary, 269
	Bibliographical and Historical Remarks, 270
	Problems, 271
	Computer exercises, 278
	Bibliography, 281
	AM UTIL AVED A EL IDA E A ETENICO DAG
6	MULTILAYER NEURAL NETWORKS
	6.1 Introduction, 282
	6.2 Feedforward Operation and Classification, 284
	6.2.1 General Feedforward Operation, 286
	6.2.2 Expressive Power of Multilayer Networks, 287
	6.3 Backpropagation Algorithm, 288
	6.3.1 Network Learning, 289
	6.3.2 Training Protocols, 293
	6.3.3 Learning Curves, 295
	6.4 Error Surfaces, 296
	6.4.1 Some Small Networks, 296
	6.4.2 The Exclusive-OR (XOR), 298
	6.4.3 Larger Networks, 298
	6.4.4 How Important Are Multiple Minima?, 299
	6.5 Backpropagation as Feature Mapping, 299
	6.5.1 Representations at the Hidden Layer—Weights, 302
	6.6 Backpropagation, Bayes Theory and Probability, 303
	6.6.1 Bayes Discriminants and Neural Networks, 303
	6.6.2 Outputs as Probabilities, 304
	*6.7 Related Statistical Techniques, 305
	6.8 Practical Techniques for Improving Backpropagation, 3066.8.1 Activation Function, 307
	•
	6.8.2 Parameters for the Sigmoid, 3086.8.3 Scaling Input, 308
	6.8.4 Target Values, 309
	6.8.5 Training with Noise, 310
	6.8.6 Manufacturing Data, 310
	6.8.7 Number of Hidden Units, 310
	6.8.8 Initializing Weights, 311
	6.8.9 Learning Rates, 312
	6.8.10 Momentum, 313
	6.8.11 Weight Decay, 314
	6.8.12 Hints, 315
	6.8.13 On-Line, Stochastic or Batch Training?, 316
	6.8.14 Stopped Training, 316
	6.8.15 Number of Hidden Layers, 317
	6.8.16 Criterion Function, 318
	*6.9 Second-Order Methods, 318
	6.9.1 Hessian Matrix, 318
	6.9.2. Newton's Method, 319

6.9.4 Conjugate Gradient Descent, 321 *6.10 Additional Networks and Training Methods, 324 6.10.1 Radial Basis Function Networks (RBFs), 324 6.10.2 Special Bases, 325 6.10.3 Matched Filters, 325 6.10.4 Convolutional Networks, 326 6.10.5 Recurrent Networks, 326 6.10.6 Cascade-Correlation, 329 6.11 Regularization, Complexity Adjustment and Pruning, 330 Summary, 333 Bibliographical and Historical Remarks, 333 Problems, 335 Computer exercises, 343 Bibliography, 347 7 STOCHASTIC METHODS 7.1 Introduction, 350 7.2 Stochastic Search, 351 7.2.1 Simulated Annealing, 351 7.2.2 The Boltzmann Factor, 352 7.2.3 Deterministic Simulated Annealing, 357 7.3 Boltzmam Learning, 360 7.3.1 Stochastic Boltzmann Learning of Visible States, 360 7.3.2 Missing Features and Category Constraints, 365 7.3.3 Deterministic Boltzmann Learning, 366 7.3.4 Initialization and Setting Parameters, 367 *7.4 Boltzmamn Networks and Graphical Models, 370 7.4.1 Other Graphical Models, 372 *7.5 Evolutionary Methods, 373 7.5.1 Genetic Algorithms, 373 7.5.2 Further Heuristics, 377 7.5.3 Why Do They Work?, 378 *7.6 Genetic Programming, 378 Summary, 381 Bibliographical and Historical Remarks, 381 Problems, 383 Computer exercises, 388 Bibliography, 391 8 NONMETRIC METHODS 8.1 Introduction, 394 8.2 Decision Trees, 395 8.3.1 Number of Splits, 397 8.3.2 Query Selection and Node Impurity, 398 8.3.3 When to Stop Splitting, 402	*6.10 Additional Networks and Training Methods, 324 6.10.1 Radial Basis Function Networks (RBFs), 324 6.10.2 Special Bases, 325 6.10.3 Matched Filters, 325 6.10.4 Convolutional Networks, 326
*6.10 Additional Networks and Training Methods, 324 6.10.1 Radial Basis Function Networks (RBFs), 324 6.10.2 Special Bases, 325 6.10.3 Matched Filters, 325 6.10.4 Convolutional Networks, 326 6.10.5 Recurrent Networks, 328 6.10.6 Cascade-Correlation, 329 6.11 Regularization, Complexity Adjustment and Pruning, 330 Summary, 333 Bibliographical and Historical Remarks, 333 Problems, 335 Computer exercises, 343 Bibliography, 347 7 STOCHASTIC METHODS 7.1 Introduction, 350 7.2 Stochastic Search, 351 7.2.1 Simulated Annealing, 351 7.2.2 The Boltzmann Factor, 352 7.2.3 Deterministic Simulated Annealing, 357 7.3 Boltzmann Learning, 360 7.3.1 Stochastic Boltzmann Learning of Visible States, 360 7.3.2 Missing Features and Category Constraints, 365 7.3.3 Deterministic Boltzmann Learning, 366 7.3.4 Initialization and Setting Parameters, 367 *7.4 Boltzmann Networks and Graphical Models, 370 7.4.1 Other Graphical Models, 372 *7.5 Evolutionary Methods, 373 7.5.1 Genetic Algorithms, 373 7.5.2 Further Heuristics, 377 7.5.3 Why Do They Work?, 378 *7.6 Genetic Programming, 378 Summary, 381 Bibliographical and Historical Remarks, 381 Problems, 383 Computer exercises, 388 Bibliography, 391 8 NONMETRIC METHODS 8.1 Introduction, 394 8.2 Decision Trees, 395 8.3 CART, 396 8.3.1 Number of Splits, 397 8.3.2 Query Selection and Node Impurity, 398 8.3.3 When to Stop Splitting, 402	*6.10 Additional Networks and Training Methods, 324 6.10.1 Radial Basis Function Networks (RBFs), 324 6.10.2 Special Bases, 325 6.10.3 Matched Filters, 325 6.10.4 Convolutional Networks, 326
*6.10 Additional Networks and Training Methods, 324 6.10.1 Radial Basis Function Networks (RBFs), 324 6.10.2 Special Bases, 325 6.10.3 Matched Filters, 325 6.10.4 Convolutional Networks, 326 6.10.5 Recurrent Networks, 328 6.10.6 Cascade-Correlation, 329 6.11 Regularization, Complexity Adjustment and Pruning, 330 Summary, 333 Bibliographical and Historical Remarks, 333 Problems, 335 Computer exercises, 343 Bibliography, 347 7 STOCHASTIC METHODS 7.1 Introduction, 350 7.2 Stochastic Search, 351 7.2.1 Simulated Annealing, 351 7.2.2 The Boltzmann Factor, 352 7.2.3 Deterministic Simulated Annealing, 357 7.3 Boltzmann Learning, 360 7.3.1 Sinchastic Boltzmann Learning of Visible States, 360 7.3.2 Missing Features and Category Constraints, 365 7.3.3 Deterministic Boltzmann Learning, 366 7.3.4 Initialization and Setting Parameters, 367 *7.4 Boltzmann Networks and Graphical Models, 370 7.4.1 Other Graphical Models, 372 *7.5 Evolutionary Methods, 373 7.5.1 Genetic Algorithms, 373 7.5.2 Further Heuristics, 377 7.5.3 Why Do They Work?, 378 *7.6 Genetic Programming, 378 Summary, 381 Bibliographical and Historical Remarks, 381 Problems, 383 Computer exercises, 388 Bibliography, 391 8 NONMETRIC METHODS 8.1 Introduction, 394 8.2 Decision Trees, 395 8.3 CART, 396 8.3.1 Number of Splits, 397 8.3.2 Query Selection and Node Impurity, 398 8.3.3 When to Stop Splitting, 402	*6.10 Additional Networks and Training Methods, 324 6.10.1 Radial Basis Function Networks (RBFs), 324 6.10.2 Special Bases, 325 6.10.3 Matched Filters, 325 6.10.4 Convolutional Networks, 326
6.10.1 Radial Basis Function Networks (RBFs), 324 6.10.2 Special Bases, 325 6.10.3 Matched Filters, 325 6.10.4 Convolutional Networks, 326 6.10.5 Recurrent Networks, 328 6.10.6 Cascade-Correlation, 329 6.11 Regularization, Complexity Adjustment and Pruning, 330 Summary, 333 Bibliographical and Historical Remarks, 333 Problems, 335 Computer exercises, 343 Bibliography, 347 7 STOCHASTIC METHODS 7.1 Introduction, 350 7.2 Stochastic Search, 351 7.2.1 Simulated Annealing, 351 7.2.2 The Boltzmann Factor, 352 7.2.3 Deterministic Simulated Annealing, 357 7.3 Boltzmann Learning, 360 7.3.1 Stochastic Boltzmann Learning of Visible States, 360 7.3.2 Missing Features and Category Constraints, 365 7.3.3 Deterministic Boltzmann Learning, 366 7.3.4 Initialization and Setting Parameters, 367 *7.4 Boltzmann Networks and Graphical Models, 370 7.4.1 Other Graphical Models, 372 *7.5 Evolutionary Methods, 373 7.5.1 Genetic Algorithms, 373 7.5.2 Further Heuristics, 377 7.5.3 Why Do They Work?, 378 *7.6 Genetic Programming, 378 Summary, 381 Bibliography, 391 8 NONMETRIC METHODS 8.1 Introduction, 394 8.2 Decision Trees, 395 8.3.1 Number of Splits, 397 8.3.2 Query Selection and Node Impurity, 398 8.3.3 When to Stop Splitting, 402	6.10.1 Radial Basis Function Networks (RBFs), 3246.10.2 Special Bases, 3256.10.3 Matched Filters, 3256.10.4 Convolutional Networks, 326
6.10.2 Special Bases, 325 6.10.3 Matched Filters, 325 6.10.4 Convolutional Networks, 326 6.10.5 Recurrent Networks, 328 6.10.6 Cascade-Correlation, 329 6.11 Regularization, Complexity Adjustment and Pruning, 330 Summary, 333 Bibliographical and Historical Remarks, 333 Problems, 335 Computer exercises, 343 Bibliography, 347 7 STOCHASTIC METHODS 7.1 Introduction, 350 7.2 Stochastic Search, 351 7.2.1 Simulated Annealing, 351 7.2.2 The Boltzmann Factor, 352 7.2.3 Deterministic Simulated Annealing, 357 7.3 Boltzmann Learning, 360 7.3.1 Stochastic Boltzmann Learning of Visible States, 360 7.3.2 Missing Features and Category Constraints, 365 7.3.3 Deterministic Boltzmann Learning, 366 7.3.4 Initialization and Setting Parameters, 367 *7.4 Boltzmann Networks and Graphical Models, 370 7.4.1 Other Graphical Models, 372 *7.5.1 Genetic Algorithms, 373 7.5.2 Further Heuristics, 377 7.5.3 Why Do They Work?, 378 *7.6 Genetic Programming, 378 Summary, 381 Bibliographical and Historical Remarks, 381 Problems, 383 Computer exercises, 388 Bibliography, 391 8 NONMETRIC METHODS 8.1 Introduction, 394 8.2 Decision Trees, 395 8.3 CART, 396 8.3.1 Number of Splits, 397 8.3.2 Query Selection and Node Impurity, 398 8.3.3 When to Stop Splitting, 402	6.10.2 Special Bases, 3256.10.3 Matched Filters, 3256.10.4 Convolutional Networks, 326
6.10.3 Matched Filters, 325 6.10.4 Convolutional Networks, 326 6.10.5 Recurrent Networks, 328 6.10.6 Cascade-Correlation, 329 6.11 Regularization, Complexity Adjustment and Pruning, 330 Summary, 333 Bibliographical and Historical Remarks, 333 Problems, 335 Computer exercises, 343 Bibliography, 347 7 STOCHASTIC METHODS 7.1 Introduction, 350 7.2 Stochastic Search, 351 7.2.1 Simulated Annealing, 351 7.2.2 The Boltzmann Factor, 352 7.2.3 Deterministic Simulated Annealing, 357 7.3 Boltzmann Learning, 360 7.3.1 Stochastic Boltzmann Learning of Visible States, 360 7.3.2 Missing Features and Category Constraints, 365 7.3.3 Deterministic Boltzmann Learning, 366 7.3.4 Initialization and Setting Parameters, 367 *7.4 Boltzmann Networks and Graphical Models, 370 7.4.1 Other Graphical Models, 372 *7.5 Evolutionary Methods, 373 7.5.1 Genetic Algorithms, 373 7.5.2 Further Heuristics, 377 7.5.3 Why Do They Work?, 378 *7.6 Genetic Programming, 378 Summary, 381 Bibliographical and Historical Remarks, 381 Problems, 383 Computer exercises, 388 Bibliography, 391 8 NONMETRIC METHODS 8.1 Introduction, 394 8.2 Decision Trees, 395 8.3 CAKT, 396 8.3.1 Number of Splits, 397 8.3.2 Query Selection and Node Impurity, 398 8.3.3 When to Stop Splitting, 402	6.10.3 Matched Filters, 3256.10.4 Convolutional Networks, 326
